

**Remarks**

Claims 61-76 are in the application, of which claims 61 and 62 are independent and allowed. (The preamble of claim 61 has been amended to substitute "light pattern" for "image" to make consistent the terminology used throughout the claim.) Claims 1-60 are canceled, and claims 63-76 are new.

All previously pending, now canceled, claims 1-12, 14-16, 31, 39-49, and 54 stand rejected on various grounds. To secure immediate allowance of the patent application, applicants have canceled all of the rejected claims and presented new claims dependent on allowed claims 61 and 62. Specifically, new claims 63-70 depend directly or indirectly on claim 61 and recite the subject matter of the respective canceled dependent claims 2, 5-10, and 16; and new claims 71-76 depend on claim 62 and recite the subject matter of the respective canceled claims 2-4, 8, 10, and 11.

Applicants reserve their right to file a divisional patent application directed to claims 21-30 previously canceled in response to a restriction requirement and a continuation application directed to the canceled rejected claims.

Applicants believe their application is in condition for allowance and respectfully request the same.

Respectfully submitted,

**Benjamin R. Clifton and  
John P. Fogarty**
